CONVOSYNC ®
SOLUTIONS

ENHANCE YOUR BUSINESS WITH OUR SYNCHRONIZED SOLUTIONS

ABOUT US

Being an IT Service Provider, ConvoSync is committed to boost the organizational effectiveness of its customers by efficiently providing cost-effective, optimal and integrated IT solutions and services. We strive to ensure customer satisfaction with excellence in services. Helping our clients get the most out of their investments in technology infrastructure remains our top priority.

What we offer you is the very best that the IT Service industry has to offer.

SERVICES

1

AUDIO VISUAL & UNIFIED COMMUNICATIONS

- Digital Signage Solutions
- Interactive Displays And Screens
- Multi-screen Video Wall Solutions
- Video Conferencing System
- Iptv Systems
- Unified Communication
- Home Theater Solutions
- Multi-room Audio Systems

2

ELV & SECURITY SERVICES

- CCTV
- Access Control System
- Fire Alarm System
- Building Management System (Bms)
- Lighting Control System
- Public Address System
- Gate Management System
- Intelligent Office Automation System

CONVOSYNC
SOLUTIONS ®

SERVICES

3

ICT SOLUTIONS

- Structured Cabling
- Rack & Cabinet Solutions
- Servers And Storage
- It Managed Services
- Virtualization Solution
- Backup Solutions
- Software Defined Storage
- Virtualizing Business
  Critical Applications

4

DATA CENTER AND CYBERSECURITY SERVICES

- Data Center and Site Infrastructure
- Data Center Infrastructure
  Management (DCIM)
- Micro Data Center Solutions
- Aisle Containment Solutions
- Modular & Container Data Centers
- Software-Defined Data Center
- Endpoint Control & Security
- Email & Web Security
- Network Security & Design

DIGITAL SIGNAGE
SOLUTIONS

Digital signage refers to electronic displays such as LED, LCD, and plasma screens that are used to display information, advertising, menus, and television programming.
Digital signage is cost-effective and versatile, allowing for quick content updates and the addition of interactive features.

INTERACTIVE **DISPLAYS** AND **SCREENS**

Enables business users to create, manage and deploy compelling, interactive presentations to an unlimited number of participants. An intuitive interface delivers the tools you need for streamlined and efficient interaction with the touchscreen.

MULTI-SCREEN **VIDEO WALL SOLUTIONS**

A video wall consists of several video screens, such as plasma panels, CRT monitors, or LCDs, that are placed on top of each other and/or side by side. Each of the screens in the array is configured to only play content of the video frame which corresponds to its position within the array of screens. Video wall setups can play any combination of video in high resolution.

VIDEO CONFERENCING SYSTEM

The ability to communicate and share information in real time over any device and across any network is a distinct competitive advantage. Conference room, desktop and mobile platforms can be integrated in a voice and video conferencing system enabling your organization to enhance collaboration and reduce costs.

IPTV
SYSTEMS

IPTV is the delivery of television content over computer networks based on the logical Internet Protocol (IP), rather than through traditional terrestrial, satellite, and cable television formats. Unlike downloaded media, IPTV offers the ability to stream the source media continuously.

HOME THEATER
SOLUTIONS

Enjoy a superior visual experience. ConvoSync offers and custom designs the newest and cutting-edge technology home theater solutions which best fit your needs. From large display screens and televisions with surround sound systems, DVD and Blu-ray players/recorders to the ultra-modern 6D viewing experience.

UNIFIED
COMMUNICATION

ConvoSync can provide you the best of unified communication and collaboration solution by incorporating telephony into your current communication infrastructure. This will accelerate your workflow and ensure commercial benefits. The security measures can be heightened by restricting the access to a limited group or staff.

MULTI-ROOM
AUDIO SYSTEMS

A multi-room audio system gives you the power to distribute music and TV/video channels to any room/area of the building with the touch of a wall-mounted keypad. No wires, no obtrusive loudspeakers, since the system is designed for use with in-ceiling or flush-mounting in-wall.

CCTV

ConvoSync provides consultation, integration, and deployment of CCTVs linked to secure IP-based networks with coherent data storage and retrieval systems

ACCESS CONTROL
SYSTEM

Access control system is a system responsible for the regulation of access & control to a system, facility/ environment.

FIRE ALARM
SYSTEM

A fire alarm is a unit made of several devices, which uses visual and audio signalization to warn people about a possible fire, smoke, or carbon monoxide occurrence in the area of coverage.

BUILDING MANAGEMENT
SYSTEM (BMS)

ConvoSync has come up with the best BMS solutions for controlling the components of HVAC works like chilling machines, pumps, fans, etc. This can prove to minimize energy utilization and boost the economy.

LIGHTING CONTROL
SYSTEM

LCS is a lighting control solution for indoor and outdoor lighting in buildings. KNX is a standardized network communication protocol for smart buildings, it provides room comfort and energy management solutions

PUBLIC ADDRESS
SYSTEM

ConvoSync offers customized PAS solutions with microphones, amplifiers, and loudspeakers to suit the sound amplification and distribution needs of small to large venues, be it for school auditoriums or commercial buildings.

GATE MANAGEMENT
SYSTEM

ConvoSync offers a Gate Management Software that restricts access to confined areas, tracks entries, and provides gate blockades for high security with low maintenance. The GMS solution is customizable and can be tailored to fit specific needs.

INTELLIGENT OFFICE
AUTOMATION SYSTEM

Office automation is a digital solution to manage office tasks and information through electronic transfer, raw data storage, and automated methods, replacing traditional manual processes

RACK & CABINET
SOLUTIONS

Our cabinets are an economical solution for data centers, with adjustable rails and removable panels for easy access. They come in different sizes and colors, and can be shipped flat or fully assembled.

STRUCTURED
CABLING

We offer design, installation, and maintenance of structured wiring systems using CAT cables and modular sockets for data or voice communications in organizations of all sizes.

Fiber Cabling

ConvoSync offers reliable end-to-end fiber network solutions for businesses, including FTTx and OSP/ISP copper and fiber optic cabling infrastructure design, installation, and maintenance.

IT MANAGED
SERVICES

Our ICT managed services offer a comprehensive range of solutions including cloud operations, infrastructure management, network design, business continuity, virtualization, storage, CMS, and data/system management for seamless service delivery and improved customer experience.

SERVERS AND
STORAGE

ConvoSync Solutions offers server consolidation and HA solutions to help organizations achieve desired QoS and committed SLA. They also provide networked storage solutions including NAS and SAN, which are customizable and efficient for businesses of all sizes.

VIRTUALIZATION
SOLUTION

Virtualization can benefit businesses by increasing IT agility, flexibility, scalability, and server utilization rates while reducing costs. ConvoSync's solutions can help build an efficient, reliable, and cost-effective virtualized infrastructure with high performance and collaboration with VMware virtualization.

VIRTUALIZING **BUSINESS CRITICAL** APPLICATIONS

Virtualizing business critical applications can maximize hardware resources, accelerate application mobility, enable easy server migration, and add an additional baseline availability.

BACKUP
SOLUTIONS

Backup software is crucial for data recovery and can be used for both personal and corporate purposes, allowing for regular backups of selected files and folders to a cloud server.

SOFTWARE
DEFINED STORAGE

Software-defined data centres abstract every component of the data centre from underlying hardware, delivering on-demand and customizable IT services, with software-defined storage transforming physical storage systems into an extensible and open virtual storage platform.

DATA CENTER AND SITE INFRASTRUCTURE

ConvoSync provides turnkey solutions for data center design and construction, including features such as UPS, CRAC units, smart PDUs, monitoring systems, and disaster management systems for mission-critical applications. They also offer consultancy services and expertise in the data center infrastructure supply chain.

DATA CENTER INFRASTRUCTURE MANAGEMENT (DCIM)

DCIM simplifies data center management and helps make smarter decisions for effective data center operations, improving functionality and design while increasing operational efficiency.

MICRO DATA CENTER
SOLUTIONS

Micro Data Center Solutions offer compact and complete server rooms with flexibility to modify, cost-effective and energy-efficient, including power distribution, cooling, mechanical infrastructure, monitoring, and accessories for expansion.

AISLE CONTAINMENT
SOLUTIONS

Software-defined data centres abstract every component of the data centre from underlying hardware, delivering on-demand and customizable IT services, with software-defined storage transforming physical storage systems into an extensible and open virtual storage platform.

MODULAR & CONTAINER DATA CENTERS

Modular and container data solutions provide flexibility and convenience for organizations, enabling them to deploy data centers in any location and adapt to changing IT environments. Our in-house expertise helps match solutions to specific project requirements.

SOFTWARE-DEFINED DATA CENTER

The Software-Defined Data Centre abstracts every component of the data centre from its hardware, allowing for customizable on-demand services. Software defined storage systems transform physical storage into a simple, open virtual storage platform, providing easily consumed IT services, simple API access, and a single management view.

ENDPOINT CONTROL & SECURITY

ConvoSync offers endpoint security solutions to effectively control internal network endpoints with suspicious file and behavior detection, providing comprehensive network security beyond firewalls and anti-viruses.

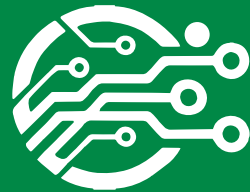

EMAIL & WEB SECURITY

ConvoSync provides top-notch web and email security solutions to protect against cyber threats, with services such as email security configuration, security optimization, security design and planning, and web security configuration.

NETWORK SECURITY & DESIGN

ConvoSync provides top-notch network security services to help organizations analyze risks, derive security planning, and lay security procedures while providing customer services like support and maintenance. Their services include layered architecture with WAN optimization solutions, layered application security, content solutions, web & email solutions, and more.

Enhance Your Business with our synchronized solution
